

# Kinetic Solar Rodent Protection

The Kinetic Solar Rodent Protection System like all Kinetic products is created with the installer in mind. The Rodent Protection System is easy to install and can withstand sliding snow. The Kinetic Solar Rodent Protection System is a part of the ever-expanding K-Rack™ line of products, which have become known in the solar racking industry for their superb quality and features.

## Material

Hardware	Stainless Steel
Mesh Wire	Welded Steel
Clamps/Clips	Aluminum

## Mesh Details

- The Kinetic wire mesh is PVC-coated, galvanized, welded steel mesh.
- 1/2" x 1/2" Mesh.
- It is available in 100 ft rolls and is 48 inches, 6 inches, or 8 inches wide.

## Key Benefits

### Fast & Secure

The Kinetic Mesh can be easily secured to the racking system/solar module with the Rodent Guard Clips and the Rodent Guard clamps. The Mesh can be fastened to the panel frame and folded under. The mesh can also be folded out at the roofline around the solar array perimeter. This fold creates tension in the mesh which ensures that birds/rodents can not get inside.

### Can withstand Sliding Snow

When the Kinetic Mesh is installed with the Rodent Guard Clips and the Rodent Guard clamps, it can withstand sliding snow.

### Reusable

Due to their high durability, the Kinetic Mesh, the Kinetic Rodent Guard Clips, and the Kinetic Rodent Guard clamps can be used multiple times.
